

**Stingray Systems ACC100/  
ACC200  
Audio & Visual Alarm**

**Model: ACC100/  
ACC200**

The ACC100 is an emergency audio and visual alarm system for emergency eye/face wash or showers. It is to be mounted to the piping of the emergency plumbing unit or attached to the wall. A single pole/double throw flow switch operates the alarm system and will cause the alarm to activate at 2.3 gpm of flow. The audio portion of the alarm is an adjustable 78-101 dB horn, while the visual portion of the alarm is an amber colored strobe light. The horn can be silenced for testing by turning it off at the speaker.

Unit requires 5 amp, 125/250V AC electrical service.

ACC200 includes all of the above plus the option to integrate the alarm system into the building maintenance system using a set of dry contacts configurable in either a normally-open or normally closed state. The ACC200 utilizes a double pole/double throw flow switch for operation.
